

# Functional Areas

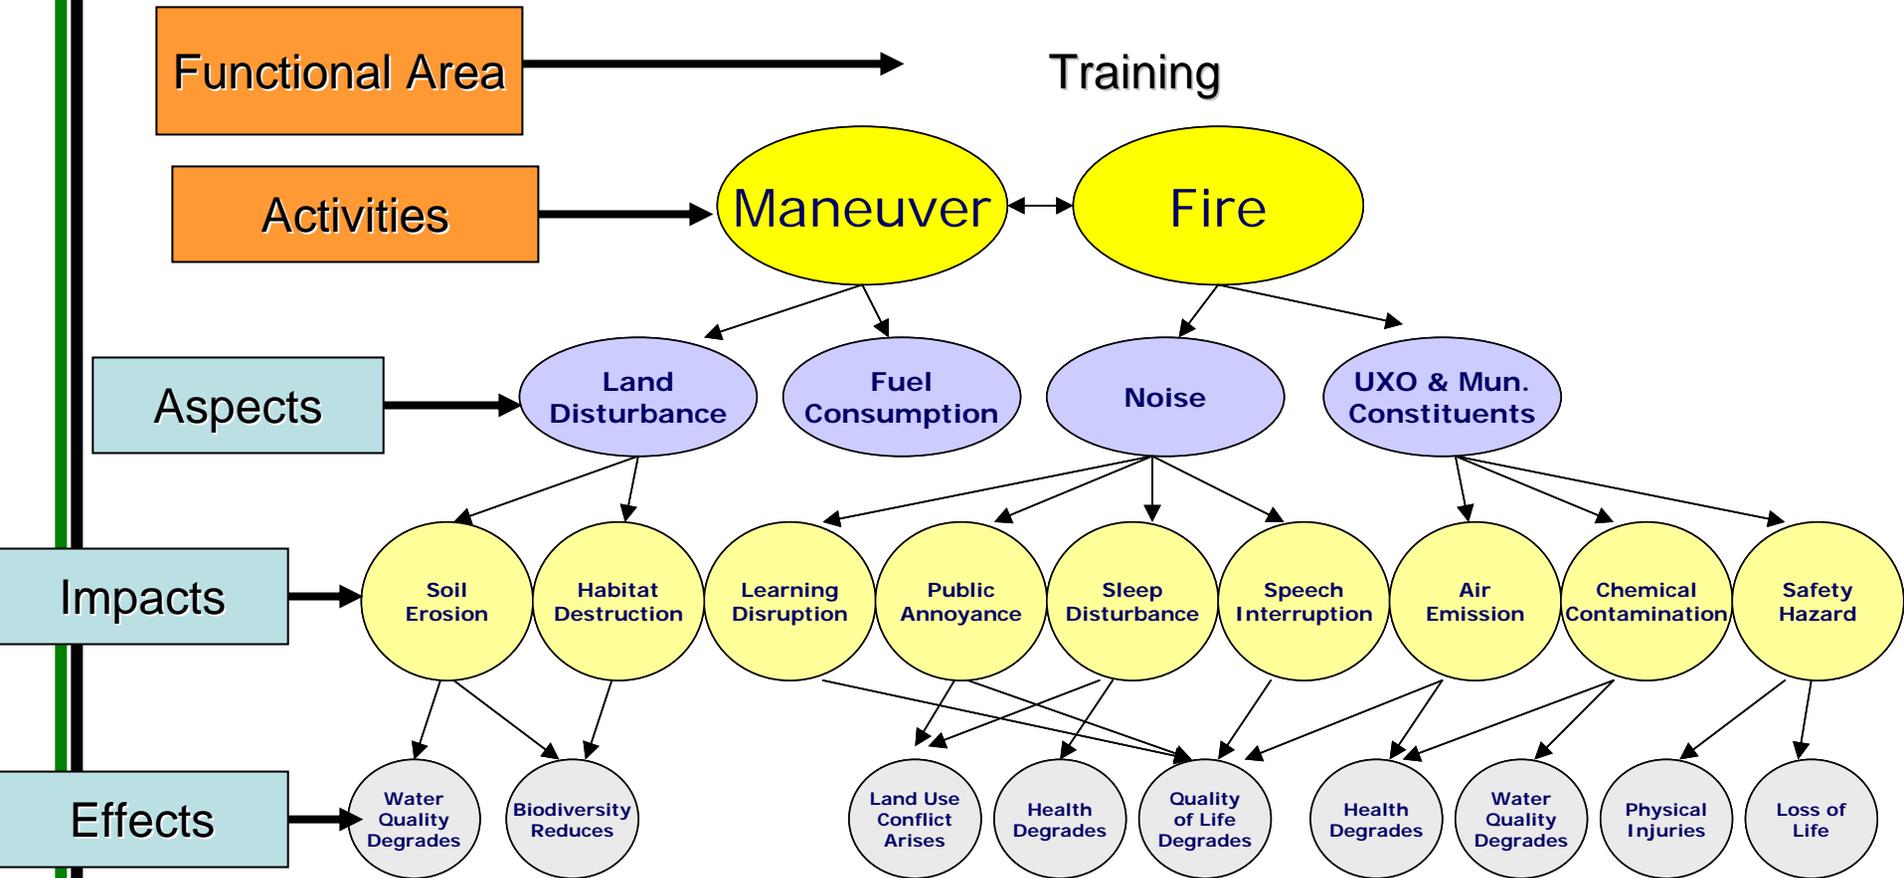

# Who are we now?

Take the next 10 minutes and, working in a small group, describe those categories of activities that Fort Eustis must accomplish to succeed in the mission.

# Functional Areas, Activities Aspects, Impacts, Effects, Huh?

# Example

## Transportation:

- Movement of people (deployment, commuting)
- Movement of equipment
- Movement of materials and products

# And

- Can any be grouped?
- Which depend upon others to succeed?

# And now, for something entirely different

You will be working in groups now. Identify the activities conducted in support of each functional area.

# Brief back

- You have five minutes to give us your results
- Did we miss anything?
